on Friday evening. They made Ola on Saturday and by hard driving they managed to reach Boise last evening.

managed to reach Boise last evening.

Mr. Whitlock said the mails were going in regularly and the road was open. There had been five snowslides between Cabin creek summit and the cutoff, but it was possible for teams to get through. Beyond Johnson creek no attempt had been made to keep the road broken all the while, but this could be done whereas a recovery.

could be done whenever necessary. Roosevelt is well supplied with pro-

visions, there being plenty of fresh meat in camp. Although a large num-ber of men have gone out of camp for

the winter, the town is not so quiet as might be supposed. Quite a lot of contracting is being done and there are

indications of great actvity n the

BOSTON AND TERRACE.

Work Progressing in Tunnel Which is Now in 280 Feet.

Herman W. Horne, consulting engineer of the Boston & Terrace Copper Mining company, which is developing a promising group of claims over on the west side of the Great Salt Lake, and in what is known as the New Foundland mining district, has returned from a trin to that property.

Mr. Horne says conditions are ex-ceedingly favorable there for the open-

ing of a good producer. A tunnel is being driven to what is known as the Shepherd lode and which shows up exceedingly well where developed nearer the surface. The tunnel is now in 280

The mine is situated eight miles from

New Foundland station on the Lucin cut-off of the Southern Pacific. Mr. Horne likes the looks of the New

Foundland district and is satisfied, now that the district is within easy reach of railroad facilities, that it will soon be a contributor to the local ore mar-

CONCENTRATES.

Flag mine has returned from a two

President John Dern and Director A.

W. Chesterton have returned from a trip to the Con. Mercur mine.

It is reported some good copper ore has been encountered on the 700 level of the Star Con. mine in Tintic.

The litigation over the title to the Snowflake property at Fay, Nev., is up for hearing before the court sitting at Pioche.

President Samuel McIntyre of the Mammoth Mining company has re-

turned from a trip to his Nevada ranch, He went out to Tintic today.

The ore and bullion settlements re-

ported late yesterday were as follows: Crude ore and concentrates, \$72,500; base bullion, \$59,000; gold bars, \$13,000.

E. J. Waugh, formerly chief clerk in the office of Broker W. H. Tibbals, has secured a one-year lease on a promising claim in the Bullfrog, Nev.,

B. L. Cutler yesterday was awarded the contract to sink the shaft at the property of the St. George Copper com-pany, the location of which is in the

Fred A. Earls, general western representative of the Dearborn Drug and Chemical company of Chicago, with headquarters in Denver, is expected to arrive in the city tomorrow.

Peter Porter has returned from a trip to Pioche, Nev. While in that camp he looked over the Half Moon, Abe Lin-

coln, Mendah and other properties. He believes the camp is going to pick up.

A. L. Morris, at one time a familiar figure on Brokers' Row, came in from the northwest this morning. He is now located at Portland, Or. Morris first came into prominence in this city

through his operations in Beaver coun-

D. J. Frew, secretary of the Holder-man Filter Tank company, left yester-day afternoon for the Golden Eagle mine, near Winnemucca, Nev., where a Holderman plant was recently in-stalled and is reported to be in success-ful operation.

At the Mt. Masonic mine at Park City last Monday, at a distance in the tunnel of 625 feet, the lode vein was encountered at a depth of 650 on the dip. The vein is a contact between lime and quartitie, and selected samples show values of 400 ounces silver and 14 per cent lead. George M. Hasson is super-intendent.

A Boston publication says:

A Boston publication says: The United States Mining company's dividend of 50 cents per share is payable Feb. 15 to stock of record Feb. 3. Books will be closed Feb. 4 to 15, both days inclusive. No statement of earnings was given out. A director says: "The only statement to be given out is that of the dividend,"

Alex Urdahl has returned from Roosevelt. The most important news brougth by him is in the nature of further verification of the recent strike

In the Standard property. He reports he made a visit to the mine a short time before leaving and found it all

that has been represented by others. The strike, Mr. Urdahl says, shows a ledge some 60 feet thick. A stratum of clay was met with after penetrating the ore body 60 feet.—Boise Statesman.

H. E. Reynolds brought to Council, last week, the first load of copper matte from the Ladd Metals companys smelt-

er at Landore. On the day following he arrival of Mr. Reynolds, two more

leads were delivered at the railroad here the three loads aggregating about six tons. The shipping of this consignment of copper marks a new era in the mining business of the Seven Devils district, as it proves that the Ladd Metals company has strick the keynote.

Metals company has struck the keynote of success in smelting the refractory ores of that section. Mr. Reynolds keforms us that the smelter is handling 60 tons of ore daily and has only enough ore to keep it busy for about six weeks, but, he says that several of the mines will now commence work on a larger.

will now commence work on a larger and more permanent basis since they have a ready sale for their product.— Council (Ida.) Advocate.

nths' trip east.

a trip to that property.

Mr. Horne says con-

MAJESTIC ON THE UP GRADE AGAIN.

Boston Was Buying the Stock Today, But Orders Sent Here Were Not Filled.

FOR NEW STOCKS \$2.122 BID

Equal to \$1.061/2 for Old Certificates -May Day Sold Up Again, but Afterwards Declined.

Majestic copper stock was wanted today, but it could not be supplied, although Boston bid 2.121/2 for the new issue, which is the equivalent of \$1,061/2 for the old certificates. Messages received from the coast from the correspondents of several brokerage firms indicated a stiff demand for it in that market, but as far as known, not a share was offered at the prevailing quotations locally,

Ten days ago several thousand shares offered here were taken up around 65 cents. But to many the rise was not unexpected, for it was a pretty sure thing when Samuel Newhouse left for the east that the proposition he had made to the Majestic directors would be accepted and would inevitably re-

sult in an advance in price.

May Day was the center of attraction May Day was the center of attraction for a while during the regular forenoon call today. A thousand shares, offered at the start-off at \$\frac{1}{2}\$, was promptly taken; this was followed by a jump to \$\frac{1}{2}\$, after which the price slackened again and closed where it was at the beginning. The holder of two lots of Century could not get more than 10 cents for the stock and it was released at that figure. New York released at that figure. New York Bonanza sold down to 46, while Yan-kee Con. remained stationary. Silver Shield brought 14 cents on the open

ASKS FOR BIG DAMAGES. Former Employe of Yampa Smelter

Lost Three Fingers, Wants \$10,000.

The Yampa Smelting company was The Yampa Smelting company was made a defendant in two \$10,000 damage suits filed in the district court. Late yesterday afternoon Gest Triandos filed a complaint in which it is alleged through the negligence of the defendant the plaintiff suffered the loss of three fingers. The latter also alleges in his complaint that he was ordered by the foreman of the smelter one Nicholaw foreman of the smelter, one Nicholas Mills, to oil part of the machinery. It was the duty of the defendant, according to complaint, to keep this ma-chinery revolving at a slow and steady

rate while it was being oiled.
Suddenly, he says, the machinery was set in motion at full speed. Triandos was thrown down off the iron plate on which he was standing. His hand was caught between the revolving plate and the scraper. As a result, he says that he had to have three fingesr of that hand amputated.

ROAD TO ROOSEVELT.

Thunder Mountain Metropolis Can be

Reached Without Difficulty. . B. Whitlock of the H. Y. mine arrived last evening from Roosevelt. He came out in company with Lee Lisen by and it took them slx days to make the trip, says the Boise Statesman, Leaving Roosevelt on Tuesday morning, they reached Reardon creek that night. Wednesday night they spent at John-son creek. The transfer was reached on Thursday night and Thunder City

Allen's Lung Balsam will positively break up a deep, racking cough past relief by other means.

DEEP CREEK OWNERS Today's Metal Quotations: SEE BRIGHT FUTURE Local settling prices as reported by the American Smelting and Refining company:

Presence of Western Pacific Surveyors in Mining Region Inspires Confidence.

FIFTY MEN WITH THE OUTFITS.

In field Betweeen Here and Wells, Nevada-The Camps to be Benefitted by New Road.

A letter received by a well known smelter official from a Deep Creek mining man bears the information that there are several Western Pacific surveying camps scattered along the probable route of the proposed road be-

tween this city and Wells, Nevada. The writer states that he is informed there are no less than 50 men connected with the several outfits and their presence in the country has had tendency to strengthen the belief that the time is rapidly approaching when the great undeveloped region in the western portions of Topele and Juab counties in this state, and the country contiguous to it, in Nevada, will have transportation facilities.

The writer states also, that an unusual amount of activity is being displayed throughout the Deep Creek region at the present time and attributes it to the stir being made in railroad circles.

The new road will probably pass through the country to the north of Fish Springs, but will penetrate the Clifton mining district in which sev-eral properties are developed to the eral properties are developed to the pont where they would pay a good profit to the owners if transportation facilities were available. The other districts to derive benefit by the building of the line will be Dugway, Granite Mountain, Fish Springs, Willow Springs, Dutch Mountain, Therber, Silver Island, Dolly Varden, Spruce Mountain, Cherry Creek and others. There is an almost continuous chain of mining camps that would be tapped and opened to development by the con-

of mining camps that would be tapped and opened to development by the construction of the Western Pacific.

The smelter official, who, for reasons best known to himself, does not care to be quoted, declared today that the present tonnage of ore treated at the Salt Lake smelters could be doubled within one year after the road goes into commission. "There are a whole lot commission. "There are a whole lot of properties out there," said he, "that can ser in ore as soon as the transcan sem in ore as soon as the transportation facilities are provided. I know of one mine alone, that can be depended on for 500 tons a day; this is the Woodman property, acquired a number of years ago by the late Col. J. F. Woodman. Others might send in anywhere from 25 to 100 tons a day and, with a few months devoted to energetic development, the output could energetic development, the output could be materially increased. I believe it a conservative statement when I say the present tonnage handled by the smelters could be doubled in 12 months' time after the Western Pacific is built through the camps to the west of us. In the Clifton district Paul Roden

house is developing a gold bearing property. The owners of the Lucy L. are carrying on a vigorous campaign there and are reported to have recent ly encountered auriferous ores con-taining sensational values. An up-raise is being made from the tunnel to connect with the shaft. A force of men is engaged at the M. R. Evans property and the leasers at the Midas mine are encouraged over the results they are getting. On the whole the outlook for the

Deep Creek country never looked quite as promising as it does at the present

THE COLUMBUS CON. Much Interest Being Manifested in Next Week's Meeting.

Considerable interest is being manifested in the coming annual stockhold-ers' meeting of the Columbus Consoli-dated Mining company, which is to take place in Tuesday of next week. At this meeting the policy of the company to be carried out in the future will be

Because no substantial results have Because no substantial results have yet been received. It is said some opposition to the re-election of President and Manager Tony Jacobson has developed; but friends of the latter declare the insurgents will not muster up enough strength to make any material change in the present board. terial change in the present board. Manager Jacobson has been confronted with a series of annoyances during the past year; things have not come out entirely as he expected, and he has been just as sorely disappointed as have the other shareholders. The water shortage at the mill and power plant has interfered with progress materially by hindering the operation of the mill, which, since starting up in November, has not been run at any time to exceed one-third its capacity. These are con-ditions over which Manager Jacobson has had no control, but this difficulty will soon be ended. The storm of to-day, and the last few days, will have a tendency to increase the flow of Little Cottonwood creek; but by the time another winter comes on the late difficulties.

ties will be entirely removed by making plans accordingly.

In one thing the shareholders of the Columbus are united; and that is in the matter of obtaining the services of an A No. 1 mill man. Supt. Sherman of the Dall West will probably be called into Daly-West will probably be called into consultation, which will be a good move, that will meet with universal approval; for if the present plant con-tains any defects he is familiar enough with the Alta ores to soon find a rem-cdy. Mr. Sherman has already made some experiments with the ores, which are not difficult to treat. Somes slimes occur, but not to any serious extent,

U. S. IMPROVEMENTS.

Boston Advices Say Company Will Build

A Concentrator. From a Boston source informa-tion has been received that the United States Mining company has in contemplation the erection of a 200-ton concentrating mill during the present year. In fact, it is said the plans are now being drawn for it, and therefore everything goes to indicate that the plant will be in the course of construction. will be in the course of construction within a very short time. The location will probably be at a point somewhere its smelter.

The Bingham mines of the company ontain some ores that can be concentrated advantageously and undoubtedly this is among 'he plane to be persued by Manager Fitch in his campaign to place the properties of the United States upon a solid earning basis. Since

IF YOUR FAMILY IS SICK YOU CALL ON THE MARKET OPENED

DOCTOR

SMITH'S FLOUR.

taking charge, Manager Fitch has in roduced several innovations in the con-fuct of things, particularly at the smelter, where the company has been con-fronted with some tough metallurgical problems. The new lead smelter seems to be accomplishing satisfactory results and is moving off without any serious hitch.

Great Bend Surveys

From Frank B. Cook, one of the principal shareholders in the Goldfield Great Bend mine of Goldfield, it was learned today that the patent surveys for that property have been completed.

Paymaster 03

LOCAL MARKETS.

Poultry continues scarce in the local

markets, but consumers are managing

to get enough to eat. There is no change in the flour market, although

local millers are not feeling very easy

over the reduced scale of prices; and

the green grocers and fruit dealers are

receiving generous supplies of fruits and vegetables from the Pacific coast.

The fish market is easy, with additions

in the shape of barracudas, fresh mack-

WESTERN MARKET LETTER.

Special Correspondence.

Special Correspondence.

Kansas City, Mo., Jan. 30.—The cattle run last week was not heavy at all, but it consisted more largely of fed steers than usual, and they were of better quality. A few sales were at \$5.60 and a great many at \$5.25 to \$5.50. Fed western steers sold up to \$5.40, and the fair to good beef steers advanced 10 to 20 cents for the week. Medium to common cattle sold lower, however, and the mistake of taking cattle out and the mistake of taking cattle out and the mistake of taking cattle out of the feed lot too soon was again illus-trated in a good many cases. Best cows held steady, but other kinds sold lower. Receipts today are moderate here and elsewhere, and the market on all kinds is strong to 10 cents higher It has been demonstrated half a dozer times since the holidays that any day when receipts are small, or there is a prospect of continued light receipts, as in case of a storm, prices immediately jump up, and competition is keen among buyers. And besides, there is a gradual upward movement, and prices have now reached a point where eeders are making a little money. shipment of 18 cars of short hay fed cattle were here from Hotchkiss early in the week, that sold very well. The steers sold at \$3.70, and \$3.85, 650 to 950 pounds, and cows around 1,000 pounds sold at \$3.15 to \$3.45. All around the cattle market way he will defined. cattle market may be called fairly healthy.

After Tuesday of last week the sheep and lamb market broke badly, and by Friday it was hard to move anything. Prices had reached their pinnacle Monday, and even Tuesday sales were easily affected at the high plane, but buyers filled their orders, and then laid

We'll tell you all about it then.

down ralance of the week. Some of the salesmen became panic stricken also, and advices went out telling customers to hold back their stuff. A good many sheep and lambs were already on the road, however, and today's supply is 7,009 head. Sales of Monte Vista lambs today are at \$6.85 to \$7.10, as compared with \$7 to \$7.35 Monday and Tuesday. The market is fairly active today, and has more than half recovered from its sickness of last week. Prices today are strong to 10 cents higher than last Friday. Yearlings sold at \$6.25 today, wethers, \$5: ewes, \$4.75, but toppy ewes and wethers would sell for 25 to 35 cents more than this. The lambs today are light weight, 67 to 73 pounds. A steady market is looked for balance of the week. fown ralance of the week. Some of the New York, Feb. 2.-Gains were very evenly divided in the opening quotations or stocks today and were small for the standard stocks. The trading was quiet, and there were no conspicuous features.

DAILY GRAIN LETTER.

Messrs. Logan-Bryan of Chicago telegraph their local correspondents, James A. Pollock & Co., over their pri-vate wire, on the grain and provision situation, as follows:

vate wire, on the grain and provision situation, as follows:

Chicago, Feb. L.—Wheat—This market has had another session of backing and filling without any fixed tendency to price movement. The recent snap and activity in the cash markets were not in evidence today, but on the whole the primary markets report a strong tone. The speculative situation is strained and unnnatural, with traders generally on the anxious seat. The action of the market would suggest that the large holders have probably marketed some of their wheat, but sentiment is still doubtful if market could stand much selling from this source. What they have sold will likely be bought back on decliner to replace the line and also to serve as supporting purpose.

Corn—Receipts being smaller than the estimate, caused a better feeling in this market in the early dealings, but the press of offerings again changed the sentiment. Trade continues very unsatisfactory. We believe the cash situation must exhibit more snap to take care of corn coming to maket. Without this improvement stocks will accumulate and the speculative market likely to drag lower. Oats—Trade continues to be largely of a professional character with no special feature. We continue to feel the large visible must show a better consumptive demand in order to bring about and maintain improvement.

Provisions—We are unable to see any immediate chance for improvement and still believe the immediate course of prices will depend entirely on hog receipts. We look for a s. Living market for the present.

TEA

US imports but little more in 1904 than in 1864.

So much poor tea.

Your gracer returns your money if you don't like Schilling's Rest.
